

Supplementary Table 2. Bottleneck diameter and planned cylinder length by sex

Sex	No.	Bottleneck diameter	Cylinder length
Male	42	7.34±1.10	127.85±8.54
Female	40	5.93±0.98	128.85±8.20
P-value		<0.001	0.59

Values are presented as mean±standard deviation. Bottleneck diameter and planned cylinder length are reported in millimeters. P-values were calculated using two-sided independent-samples t-tests comparing males and females.
